

ChatJet

www.chatjet.com

Version 2.0

Give
free
reign
to your
imagination

You are looking for a chat on your homepage?

With ChatJet you will find a convincing solution!

Chat is cool

No professional web site these days can do without a chat room. Chat is all part of the Internet. Users want to take an active part in discussing topics and not just read advertisements.

Chat is announced

Interesting discussions are announced in advance, for specific times and with well-known personalities. This means that visitors to your site are provided with the information they require!

Chat is dull?

A lot of chat rooms are really dull. No proper design or layout, nothing. Discerning users will not come back. The world of chatting looks different with ChatJet.

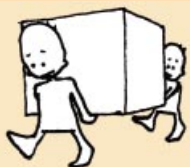

Chat is live

Where else can visitors to your site play an active part? Where else can they receive fast feedback and discuss current topics in depth?

Chat is more

Chat is faster than an email - it really is on-line! Chat is better than telephone calls, since more people can take part at the same time.

ChatJet allows an almost unlimited number of visitors to your site to chat with each other and provide feedback on your topics.

ChatJet is design

At last you can realize your own design concepts or your corporate identity in a chat room using ChatJet. Let your imagination run riot!

ChatJet is power

Rarely any other chat server has such a fast response time as ChatJet. Compare its speed with other chat products. No more waiting!

ChatJet is flexible

Every product detail can be customized both in appearance and functionality - even while ChatJet is running!

ChatJet is easy

Easy to use and well-structured for the user. All the important commands for the administrator and a large variety of control features for the webmaster. It's so easy!

ChatJet grows

ChatJet can cope with all your demands and can be customized to match the most widely varying requirements. See for yourself!

ChatJet
